2011 Texas Agricultural Custom Rates

Introduction

The data presented in this publication represent the responses of a survey conducted in January through March of 2011 by the Texas AgriLife Extension Service, Department of Agricultural Economics. Survey respondents include both providers and users of custom services, and data reflect the prices paid for typical farm and ranch custom operations. The 2011 survey and publication is a departure from the survey methodology of past Texas Custom Rate Statistics Reports, and may not be directly comparable to previous publications.

The survey data and publication include rates for tractor rental, row crop field operations, harvesting, hay baling, various land improvements, and livestock services. Inclusions and exclusions are noted in each section, but typically materials are not included in the rates listed. For each rate, five statistics are reported: number of responses, average rate, minimum, maximum, and most common. For rates where no common responses are recorded, the most common statistic will indicate N/A. Some custom rates are charged based on a set of factors rather than a single rate. For example, corn harvesting may be priced at a rate/acre + rate/bushel + overage charge for yield over a specified level. For these combination rates, we simply report the statistics of each individual factor.

Reliability of rates and statistics reported are highly dependent on the number of responses in each category. Categories were left blank if fewer than three useable responses were collected. Data are presented on a regional and statewide level only. Geographic regions (North, East, West, and South) follow the administrative regions of the Texas AgriLife Extension Service.

The survey coordinating team extends its gratitude to the survey respondents that took the time to complete and return the survey, as well as the AgriLife Extension County Agents that supported the survey process.

2011 Texas Agricultural Custom Rates

Survey Methodology

The 2011 Texas Agricultural Custom Rates Survey was developed to provide information regarding typical prices paid/charged for custom agricultural services or operations.

The sampling of agricultural custom service providers and users was developed with the assistance of the entire Texas AgriLife Extension Service network across the State. On a county by county basis individuals were selected for their anticipated knowledge of custom rates in the area. A total of 1620 surveys were mailed to individuals covering 219 counties. A reminder postcard was sent two weeks after the first mailing. A second survey was mailed a month after the first to individuals that had not responded initially. Participants were asked to voluntarily provide information on only the custom rates with which they were familiar.

A total of 307 usable responses were collected and analyzed for publication. Prior to publication, the survey data was reviewed and a minimal number of responses were eliminated to avoid unreasonable price ranges.

2011 Texas Agricultural Custom Rates, Sample and Reports by Region

Region	Sample Size	Useable Responses
North	523	94
East	312	66
West	481	90
South	304	57
State	1620	307
