Business Entity Planning
Overview

- Most farm and ranch businesses are owned by family members.
- Income and estate taxes and the sharing of income often create questions about the “best” business organization to use.
- Owners may also be concerned with how decision-making issues, management of liability, and access to non-traditional sources of investment capital may shape the business entity decision.
Consideration When Choosing the Form of Business Entity

- Life/stage of business
- Sources of capital
- Inter/intra family issues
- Taxes
- Risk management
- Estate planning implications
- Management or control
- Termination of business
- Texas franchise tax
- Multiple entities
Life/stage of Business

- The life cycle of the business is tied to that of the owner.
- Younger farmers may have little equity, debt capacity or management ability, but possibly excess labor.
- Older producers may become less willing to maintain the level of commitment necessary to continue the operation at peak efficiency.
- Younger producers may be willing to take on partners or investors in order to gain access to additional capital or other resources.
- Older business managers may view their choice of business entity as an opportunity to transfer management and ownership of the business and maintain greater efficiency.
The personal objectives of the people involved are critical. These objectives could include lowering estate taxes, providing for a surviving spouse, allocating assets among children, or continuing the business.
Sources of Capital

- All agricultural producers strive to lower their costs.
- The high cost of equity capital may lead them to seek non-traditional, lower cost sources of capital.
- Many producers also are no longer willing to expose their equity to the same level of risk they have had in the past.
- This is leading producers to seek outside investors who are willing to assume some financial risk, and may mean adopting a business structure not typically associated with production agriculture (e.g. partnership, corporation, limited liability company or real estate investment trust)
If the objective of maintaining independence and control dominates organizational and financial decisions, as it does in many small businesses, this may very well dictate the way the business is structured.
Inter/Intra Family Issues

- Family issues include differences in labor or management inputs from family members, the employment of spouses, or the hiring of children.
- Certain business entity choices may eliminate certain tax incentives for hiring children.
- Bylaws or operating agreements can spell out what activities family members can participate in.
- Contingencies for as many of these issues as possible should be considered when choosing an operating entity.
Termination

- Because of the low rate at which new businesses succeed and existing businesses are transferred successfully to the next generation, specific attention should be given to the methods by which an owner can withdraw from a business or the way a business will be terminated.

- Withdrawal or termination may become necessary if any of the partners, members or stockholders divorce, retire or die.
Taxes

- The full effects of a particular business structure on income taxes may not be known for years.
- Certain tax ramifications may not be experienced until the dissolution of a business entity.
- Entities that are registered with the Texas Secretary of State, limited partnerships, corporations, and limited liability companies are subject to a Texas State Franchise Tax.
- There should be considerable analysis and input from tax and legal professionals before owners commit to a particular structure for the business.
Liability Issues

- No business structure can protect you from your own wrongful acts, negligence or misconduct, or from tort liability.
- Partners in limited partnerships, members of limited liability companies, and shareholders in corporations who are directors, officers or employees have limited financial liability.
- Theoretically, their liability is limited to their investment in the entity.
- Unfortunately, in closely held farm businesses it is difficult to differentiate non-participatory owners from owners/managers.
- All business owners should assess the liability risks to which they are exposed, take steps to isolate those risks, and deal practically and realistically with them.
Multiple Entities

- Organizing a farm or ranch into more than one entity has become a common practice.
- Often real estate resources are separated from the operating portion of the business, or risky or “dangerous” enterprise are separated from the more stable or safe enterprises, for risk management purposes.
- Income tax management, estate planning and retirement planning are also common reasons for using multiple entities.
