A: Marketing education and training pay dividends that will directly improve your bottom line! Previous graduates report their incomes have increased, on average, more than $33,000 per year.

What is the Master Marketer Program?
This program is designed for agricultural producers and agribusiness leaders experienced in marketing commodities and having some knowledge of futures and options markets. The course contains 64 hours of intensive marketing training, focusing on wheat, livestock, cotton, and feedgrains.

The first two-day session will concentrate on basic and intermediate marketing to set the stage for the remaining sessions. Major topic areas covered will include budgets/breakeven - financial analysis, basis, basic and advanced marketing strategies, and development and implementation of a marketing plan.

What Will be Taught?
The course, offering a range of topics aimed at enhancing marketing skills, will be approached from a real-world standpoint using numerous case-study examples and simulated problems. Subjects will include:

• Development and implementation of a marketing plan
• Basic and advanced marketing strategies
• Fundamental and technical analysis
• Value added and alternative marketing mechanisms
• Marketing discipline
• Weather impact on market prices

Anyone who doesn’t feel they are already at the intermediate to advanced level should attend the free futures and options leveling workshop being held on January 15, 2008, before the beginning of the Master Marketer Program.

Who Will be the Instructors?
Master Marketer Program instructors come from the faculty of the Texas Cooperative Extension, numerous other universities, and private industry. Their outstanding expertise and communication skills rank them among the best in the country.

What Do Previous Graduates Say?

– If production agriculture is your business, the Master Marketing Program is a must. - E.C. Crump, Clay County
– This is a great program. We in production agriculture know production, however, we must learn to market. - Terry McAlister, Wichita County
– There is not a doubt in my mind that every producer that is full time farming or ranching will have to know and use the knowledge that we learned in Master Marketing to survive in the next 5 years and the future. - Bob Young, Baylor County
– The Master Marketer Program: An excellent risk management intensive study - a must for any progressive ag producer today that is professionally oriented. - Ted Harter, Parker County
– This is an excellent program; very relevant, much needed, professionally presented, logically presented. - Freddie L. Duame, Wichita County

How Do I Apply?
Complete the attached application and enclose a check for $250 payable to TCE #222100-60025. Please send both by January 7, 2008 to Stan Bevers, Box 2159, Vernon, Texas 76385-2159.

What Will Be Taught?

Q: How can you get more profit from your farm/ranch operation? Answer inside

The Texas A&M University System Texas Corn Producers Board Texas Farm Bureau Cotton State Support Committee Risk Management Agency/USDA Texas Extension Education Foundation

SESSION I: Review of Basics
The first two-day session will concentrate on basic and intermediate marketing to set the stage for the remaining sessions. Major topic areas covered will include budgets/breakeven - financial analysis, basis, basic and advanced marketing strategies, and development and implementation of a marketing plan.

Dr. Stephen H. Amosson is a Regents Professor and Extension Economist based in Amarillo. Dr. Amosson's program covers a wide area of emphasis, ranging from marketing and alternative irrigation systems to waste management/water quality.

Stan J. Bevers is a Professor and Extension Economist based in Vernon. His areas of specialization include farm and ranch management, marketing/risk management, and marketing club development.

Dr. Mark L. Waller is an Associate Department Head, Professor, and Extension Economist based in College Station. Dr. Waller's program emphasis includes price risk management and market analysis, price outlook, market information collection and dissemination, evaluation of marketing alternatives, and farm policy.

Dr. Danny A. Klinefelter is a Professor of Agricultural Economics at Texas A&M University and Director of The Executive Program for Agricultural Producers. He serves as Executive Secretary for the Association of Agricultural Production Executives and is Executive Vice President of Klinefelter Farms, Inc., an Illinois family farm corporation. He is author of seven books on agricultural finance and farm business management.
SESSION II: Fundamental Analysis in Crop Markets and Production Risk Management Tools

This session will discuss the fundamental factors that influence market prices and production risk management for feedgrains and cotton. Instructors will use case studies to explain such techniques as chart formation, support/resistance, trends, moving averages oscillators, and other tools to improve market timing. The second day of this session will discuss the fundamental factors that influence livestock prices.

Dr. G.A. (Art) Barnaby, Jr. is a Professor of Agricultural Economics at Kansas State University in Manhattan, Kansas. His program emphasis includes financial planning, government commodity programs, risk, and crop insurance. Dr. Barnaby has worked extensively with the private crop insurance industry, FCIC, and farm commodity groups on crop insurance issues.

Dr. John Robinson is an Associate Professor and Extension Economist-Cotton Marketing for Texas Cooperative Extension based in College Station, Texas. His educational programming emphasizes risk management issues related to cotton, including cash markets, hedging, contracting, insurance, and policy issues.

SESSION III: Incorporating Technical Analysis in the Marketing Plan and Fundamental Analysis of Livestock Markets

The first day of this session will explore the uses of technical analysis, especially in relation to the marketing plan. The instructor will use case studies to explain such techniques as chart formation, support/resistance, trends, moving averages oscillators, and other tools to improve market timing. The second day of this session will discuss the fundamental factors that influence livestock prices.

Dr. Wayne A. Hayenga is Professor and Extension Specialist at Texas A&M University. Dr. Hayenga’s program emphasis is in teaching and coordinating educational programs in livestock and food products marketing and policy, focusing on issues relevant to Texas livestock producers.

SESSION IV: Marketing Plans, Discipline, Legal Issues, and Weather Risk/Impacts

During this final session, participants will learn more about how to incorporate what they learned in the first three sessions into the marketing plan, as well as discuss legal issues and weather risk/impacts. They will also learn how important a disciplined approach is in achieving their marketing goals.

Darrell D. Holaday is a private marketing/management consultant. Prior to his current position, he served as Manager of the Kansas Agricultural Marketing Association for Kansas Farm Bureau. He also directed the association’s FB TAX and Accounting Service. While at Kansas Farm Bureau, Mr. Holaday developed educational programs on marketing and management; published Market Sense, a weekly market information newsletter; and advised producers within Kansas Farm Bureau’s individualized consulting service, Market Sentry.

Dr. David P. Anderson is an Associate Professor and Extension Economist in the Department of Agricultural Economics at Texas A&M University. His research and Extension education activities are in livestock and food products marketing and policy, focusing on issues relevant to Texas livestock producers.
