Extension programs serve people of all ages regardless of socioeconomic level, race, color, sex, religion, disability, or national origin.
The Texas A&M University System, U.S. Department of Agriculture, and the County Commissioners Courts of Texas Cooperating

A member of The Texas A&M University System and its statewide Agriculture Program

ACKNOWLEDGMENTS

The Texas A&M AgriLife Extension Service is pleased to provide the enclosed information. Agriculture continues to play a major role in the economic development of the State of Texas. We are committed to providing continued support for this important industry.

We would like to thank the numerous producers, agribusiness leaders, County Extension Agents, Extension Program Councils, Extension Specialists, Extension Economists and District Administrators, who contributed to this report. Their assistance in gathering and estimating the annual production value of agricultural commodities produced in each Texas county is greatly appreciated.

In addition, Caroline S. Gleaton, Office Associate, provided invaluable support throughout the surveying and reporting process. Dr. John Robinson, Professor and Extension Economist, supervised and directed the report. Kassie Kampen, Graduate Assistant, performed the data tabulation and analysis.

ABOUT THE REPORT

Estimated agricultural production values are intended only as general guidelines to indicate agricultural activity and economic impact. The enclosed data are for educational purposes only and are subject to revision.

The data on the estimated value of agricultural production and related items were prepared from county projections provided in January by County Extension Agents, Extension Program Councils, and Extension Economists. Estimates made in January are subject to price changes and growing and harvesting conditions for the remainder of the season. Government payments are not included.

Production values reflect estimates by crop season, livestock marketing times, and average market price or Commodity Credit Corporation loan rate, whichever is higher. The value of commodities used on the farm is included. As a result, production values normally total slightly greater than cash receipts.

Real production value is current production value adjusted for inflation with 2005 as the base year. This value was developed using the Council of Economic Advisers' most recent GDP implicit price deflators (*Economic Indicators*, Council of Economic Advisers, U.S. Government Printing Office, January 2014).

Economic impact values were developed using IMPLAN output multipliers (Minnesota IMPLAN Group, Inc. 2010. IMPLAN Professional Version 3.0. Stillwater, Minnesota). These values estimate the state economic impact of the listed agricultural commodities from farm gate through the supply chain.

Some listed commodities are aggregates of lesser categories. "Melons" includes cantaloupes and honeydews. "Nursery" includes bedding and potted plants, cut flowers, stock, and turf. "Other Crops" includes sprigs, legume seed, and grass seed. "Other Poultry" includes pullets, quail, and other fowl. "Other Beef" includes beef breeder cattle, beef and dairy calves, value-added by stocker cattle, and slaughter cattle. "Hogs" includes hogs and feeder pigs. "Timber" includes lumber and firewood.

* Reflects current dollars not adjusted for inflation.

** Based on statewide output multipliers for agricultural commodities from farm gate through supply chain in Texas. (Minnesota IMPLAN Group, Inc. 2010. IMPLAN Professional Version 3.0. Stillwater, Minnesota)

FOR EDUCATIONAL USE ONLY

1. The first part of the document discusses the importance of maintaining accurate records in a business setting. It highlights how proper record-keeping can lead to better decision-making and operational efficiency.

2. The second section focuses on the challenges of data management in a digital age. It explores how the volume and variety of data can make it difficult to extract meaningful insights without the right tools and expertise.

3. The third part of the document addresses the issue of data security. It discusses the risks of data breaches and the importance of implementing robust security protocols to protect sensitive information.

4. The fourth section covers the role of data in marketing and sales. It explains how analyzing customer data can help businesses tailor their marketing strategies and improve their sales performance.

5. The fifth part of the document discusses the ethical implications of data collection and analysis. It emphasizes the need for transparency and consent when handling personal data.

6. The sixth section explores the future of data science and its potential to revolutionize various industries. It mentions the growing importance of artificial intelligence and machine learning in data analysis.

7. The seventh part of the document discusses the importance of data literacy for all employees in an organization. It suggests that providing training and resources can help employees make better use of the data available to them.

8. The eighth section covers the role of data in regulatory compliance. It explains how businesses must ensure that their data handling practices meet the requirements of various laws and regulations.

9. The ninth part of the document discusses the importance of data backup and recovery. It highlights the risks of data loss and the need for a reliable backup strategy to ensure business continuity.

10. The tenth and final section of the document provides a summary of the key points discussed. It reiterates the importance of data in business and the need for a comprehensive data management strategy.
