Extension programs serve people of all ages regardless of socioeconomic level, race, color, sex, religion, disability, or national origin.
The Texas A&M University System, U.S. Department of Agriculture, and the County Commissioners Courts of Texas Cooperating

A member of The Texas A&M University System and its statewide Agriculture Program

ACKNOWLEDGMENTS

The Texas A&M AgriLife Extension Service is pleased to provide the enclosed information. Agriculture continues to play a major role in the economic development of the State of Texas. We are committed to providing continued support for this important industry.

We would like to thank the numerous producers, agribusiness leaders, County Extension Agents, Extension Program Councils, Extension Specialists, Extension Economists and District Administrators, who contributed to this report. Their assistance in gathering and estimating the annual production value of agricultural commodities produced in each Texas county is greatly appreciated.

In addition, Caroline S. Gleaton, Office Associate, provided invaluable support throughout the surveying and reporting process. Dr. John Robinson, Professor and Extension Economist, supervised and directed the report. Kassie Kampen, Graduate Assistant, performed the data tabulation and analysis.

ABOUT THE REPORT

Estimated agricultural production values are intended only as general guidelines to indicate agricultural activity and economic impact. The enclosed data are for educational purposes only and are subject to revision.

The data on the estimated value of agricultural production and related items were prepared from county projections provided in January by County Extension Agents, Extension Program Councils, and Extension Economists. Estimates made in January are subject to price changes and growing and harvesting conditions for the remainder of the season. Government payments are not included.

Production values reflect estimates by crop season, livestock marketing times, and average market price or Commodity Credit Corporation loan rate, whichever is higher. The value of commodities used on the farm is included. As a result, production values normally total slightly greater than cash receipts.

Real production value is current production value adjusted for inflation with 2005 as the base year. This value was developed using the Council of Economic Advisers' most recent GDP implicit price deflators (*Economic Indicators*, Council of Economic Advisers, U.S. Government Printing Office, January 2014).

Economic impact values were developed using IMPLAN output multipliers (Minnesota IMPLAN Group, Inc. 2010. IMPLAN Professional Version 3.0. Stillwater, Minnesota). These values estimate the state economic impact of the listed agricultural commodities from farm gate through the supply chain.

Some listed commodities are aggregates of lesser categories. "Melons" includes cantaloupes and honeydews. "Nursery" includes bedding and potted plants, cut flowers, stock, and turf. "Other Crops" includes sprigs, legume seed, and grass seed. "Other Poultry" includes pullets, quail, and other fowl. "Other Beef" includes beef breeder cattle, beef and dairy calves, value-added by stocker cattle, and slaughter cattle. "Hogs" includes hogs and feeder pigs. "Timber" includes lumber and firewood.

* Reflects current dollars not adjusted for inflation.

** Based on statewide output multipliers for agricultural commodities from farm gate through supply chain in Texas. (Minnesota IMPLAN Group, Inc. 2010. IMPLAN Professional Version 3.0. Stillwater, Minnesota)

FOR EDUCATIONAL USE ONLY

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy auditing of the accounts. The text also mentions that regular reconciliation of bank statements with the company's ledger is crucial to identify any discrepancies early on.

2. The second section focuses on the classification of expenses. It provides a detailed breakdown of various cost categories, such as salaries, rent, utilities, and travel. Each category is defined with specific criteria to ensure consistency in reporting. For example, travel expenses are only included if they are directly related to business operations and are properly documented.

3. The third part of the document addresses the issue of tax compliance. It outlines the key tax laws and regulations that apply to the company's operations. It stresses the importance of staying up-to-date with changes in tax legislation and consulting with a professional tax advisor to ensure full compliance. The text also discusses the benefits of maintaining accurate records for tax purposes, such as maximizing deductions and minimizing tax liability.

4. The final section discusses the role of technology in financial management. It highlights how accounting software can streamline the recording and reporting process, reducing the risk of human error and saving time. It also mentions the importance of data security and backup procedures to protect the company's financial information from loss or theft.

5. In conclusion, the document emphasizes that effective financial management is essential for the long-term success of any business. It requires a commitment to accuracy, transparency, and compliance. By following the guidelines outlined in this document, companies can ensure that their financial records are reliable and provide a clear picture of their financial health.
