## 2009 Economic Impacts of U.S. and Minnesota Exports to Cuba CNAS Issue Brief 2010-03

March 5, 2010

The Trade Sanctions Reform and Export Enhancement Act of 2000, allows the export of U.S. agricultural products to Cuba. Since then, exports have expanded, reaching a record \$711 million in 2008. This was nearly two-thirds higher than 2007. U.S. exports to Cuba declined 26 percent in 2009 to \$528 million. This large drop-off was attributed primarily to an 18 percent decline in Cuba's per capita tourist earnings, a 30 percent drop in export earnings from nickel sales, and weak export sales of sugar and tobacco. Together, these factors severely limited the ability of ALIMPORT, the Cuban food import agency, to purchase U.S. products on a cash basis. Despite this decline, Cuba has grown to become the sixth largest U.S. agricultural market in the Latin American/Caribbean region.

For 2009, major U.S. exports to Cuba included frozen broilers, turkeys and other poultry (\$144 million), soybeans and soybean products (\$133 million), corn (\$120 million) and wheat (\$73 million). Other leading exports in 2009 were animal feeds (\$26 million), pork (\$11 million), dry beans (\$4.3 million), and processed foods and phosphate fertilizers (\$3 million) each. Minor exports were apples, pears and grapes (\$2.6 million), margarine (\$2.2 million), and treated poles (\$1.7 million).

Agricultural exports support business activity and jobs, and shipments to Cuba are no exception. The Center for North American Studies (CNAS), Texas AgriLife Research at Texas A&M University, estimates that in 2009, for every one dollar of U.S. agricultural exports to Cuba an additional \$1.96 in business activity was generated throughout the U.S. economy. Additional business activity includes indirect activity, which results from firms purchasing inputs to produce the exports, and induced activity, which is created by expenditures of income made by employees of firms in all of the affected sectors.

U.S. exports to Cuba of \$528 million required an additional \$1.04 billion in economic activity, for a total economic impact of \$1.6 billion. Processed poultry, grains and soybeans were the most important contributors to this additional economic activity, followed by animal feeds production and pork processing. Another \$121 million was needed to produce other agricultural products used to produce for export. Non-farm sectors also benefited from U.S. exports to Cuba. Business and agricultural services, real estate, finance, energy production, transportation, health services, wholesale trade and fertilizer manufacture contributed about \$1.0 billion in economic activity associated with exports to Cuba.

Nationwide, 8,584 jobs supported U.S. agricultural exports to Cuba in 2009. About one-quarter of these jobs (1,977) were in grain production, but many other sectors were also important. Nearly 800 jobs were attributed to the processing of poultry and pork for export, with 750 jobs supporting soybean exports and another 240 jobs needed to produce other agricultural goods. An additional 4,800 jobs supported the non-farm sectors that manufactured and distributed agricultural chemicals, fertilizer and other inputs used in farming and food processing, along with energy, transportation, wholesale trade and finance.

Cuba has also become an important market for Minnesota products. CNAS estimates that Minnesota agricultural exports to Cuba were valued at approximately \$30.8 million in 2009. Major Minnesota exports to Cuba were soybeans and products (\$13.4 million), corn (\$10.5 million), wheat (\$2.9 million), frozen broilers/turkeys (\$1.3 million), and pork (\$836,000). The potential exists for Cuba to expand its imports of beef and cattle, dairy products, cotton, planting seeds, horticultural

products and a variety of processed foods, but this potential is limited by current economic conditions, travel restrictions and payment requirements.

Minnesota exports to Cuba generate economic activity throughout the state and region. In 2009, Minnesota exports of \$30.8 million were supported by an additional \$15.8 million in business activity, for a total economic impact of \$46.6 million. For each dollar of Minnesota exports to Cuba, an additional \$0.51 was required to support business activity throughout the Minnesota economy. Exports of grains required \$14.3 million in business activity, while soybeans and products required \$14.5 million, poultry exports required \$1.5 million, and pork processing \$1.2 million. Animal feed exports support \$1.0 million.

Impacts of Minnesota exports are also important to sectors that have no direct export sales to Cuba. Major non-farm sectors supporting business activity include: other agricultural activities such as animal production, forestry and other crop production (\$1.5 million), real estate (\$2.3 million), wholesale and retail trade (\$1.8 million), business and financial services (\$1.1 million each), transportation (\$904,000), health care/medical services (\$630,000) and food processing and sales (\$362,000).

Minnesota exports to Cuba required 233 jobs in 2009. About 91 jobs supported grain exports, primarily wheat and corn. Soybean exports required 36 jobs, and all other direct exports required 14 jobs. Agricultural input supply and other support activities required 17 jobs to support Minnesota exports to Cuba. Wholesale trade, food service, real estate, truck transportation medical services, food and beverage stores, and other sectors contributed an additional 75 jobs that supported Minnesota exports to Cuba.

Estimated Economic Impacts of U.S. and Minnesota Exports to Cuba, 2009
-Thousand Dollars-

-1 nousand Dollars-						
	U.S.			Minnesota		
	Direct	Indirect/ Induced	Total	Direct	Indirect/ Induced	Total
<b>Total Estimated Impacts</b>						
Business Activity	\$528,213	\$1,036,890	\$1,565,103	\$30,786	\$15,839	\$46,625
Employment (# of Jobs)	2,912	5,672	8,584	131	102	233
<b>Top Exported Products</b>						
Grains (Corn and Wheat)	\$192,787	\$31,889	\$224,676	\$13,885	\$391	\$14,276
Poultry Meat	\$144,448	\$16,836	\$161,284	\$1,302	\$171	\$1,473
Soybean Products	\$71,480	\$36,941	\$108,421	\$7,209	\$95	\$7,304
Soybeans	\$61,508	\$53,405	\$114,913	\$6,142	\$1,136	\$7,278
Animal Feeds	\$25,990	\$30,763	\$56,753	\$976	\$24	\$1,000
Pork , Beef and Products	\$13,287	\$10,975	\$24,262	\$915	\$325	\$1,240
