

Cow-Calf Herd Production, Sales, Death Loss and Transfer Data

These spreadsheets provide the of sales data, accrual adjustments, data for the preparation of the market valued balance sheet and reproduction data to calculate benchmark values for the cow-calf herd. This data is required to calculate the cow-calf production and financial benchmarks.

These are the following spreadsheets provide much of the data required for this summary spreadsheet.

Once completed the data generated is used in the **Cow-Calf Ranch FFSC Financials and Production Benchmarks**.

1. Cow-Calf Sales by Category of Cattle.
2. Cattle and Horse Beginning and Ending Annual Inventory. Date is recorded for both raised and purchased breeding stock.
3. Standardized Performance Analysis (SPA) Herd Reproduction and Production Data
