^{*}Feeds include Fodders and HT Codes 2303 & 2309; #Dairy includes Food Relief (9802) which is Dairy

Southern U.S. Exports to Cuba

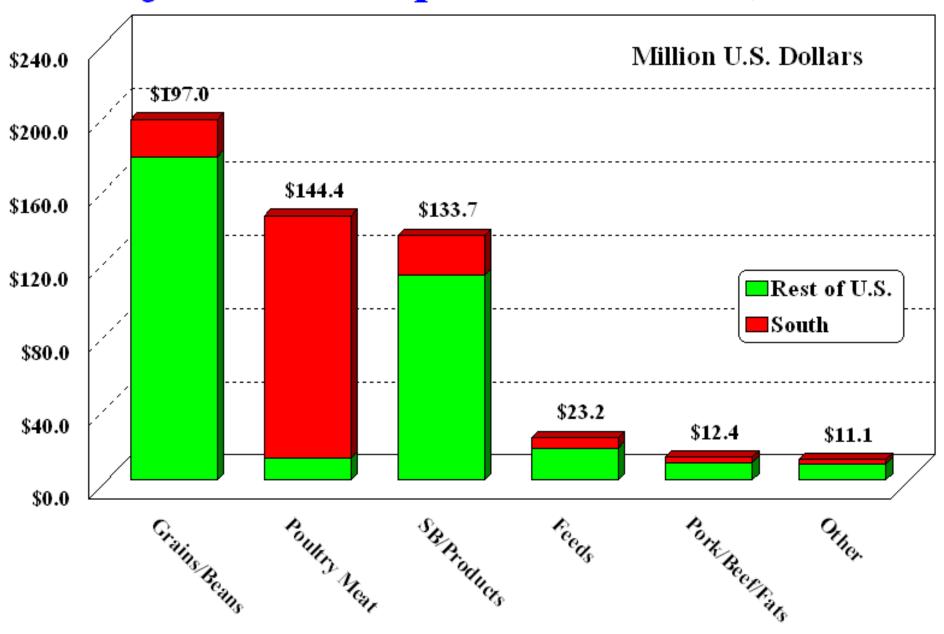

- Share of Production Method Used to Estimate U.S. Exports for Each State and then Aggregated for Region
- U.S. Exported \$119.9 Million in Corn to Cuba in 2009
 - Southern States Produced 8.7% of U.S. Corn in '09 led by TX, KY, NC, MS, & TN
 - Southern Exports of Corn to Cuba were \$10.4 Million
 - Process Done for All Sectors where Production Data Available
- As a Result, Total Southern Exports to Cuba were Estimated at \$185.2 Million during 2009
- Leading States were AR, GA, NC, TX, AL, & MS
- Leading Sectors were Grains, Poultry Meat, Soybeans and Products, Animal Feeds, and Pork

Economic Impacts of Agricultural Exports to Cuba

- ➤ Using 2008 Data for the Input-Output Model IMPLAN, Constructed a Model for the U.S. and the South
- > Input Actual U.S. the Estimated Southern U.S. Exports to Cuba into the IMPLAN
- Estimates include the Amount of Output, Value Added and Employment Required to Support the Exports
 - Direct Impacts Related to Exported Commodities
 - Indirect/Induced Impacts Related to Supporting Industries

Note: IMPLAN Work Performed by Dan Hanselka, Extension Associate, Texas AgriLife Extension Service

Input/Output Definitions

- **Output:** Increase in Business Sales Required to Support \$1 of Exports
- ➤ Value Added: Additional Gross National/ State Product due to \$1 in Exports
- **Employment:** Additional Employees Required for \$1 Million in Exports
- **Direct:** Sales of Output to Customers
- ➤ Indirect: Purchases of Inputs Required to Produce the Products for Sale
- Induced: Expenditures by Employees and Households in the Input Industries

Other Issues of Importance from U.S. of Ag Exports to Cuba

- In Most Years, All Exports to Cuba Flow through Ports Located in the Southern U.S.
- Louisiana Ports Account for Nearly Half of U.S. Exports to Cuba While Ports Located in Other Southern States Make Up the Remainder
- Recent Easing of Restrictions Regarding Travel to Cuba Could Increase Demand for Products Important to the South
- ► If Recent Efforts to Further Relieve Travel and Export Finance Restrictions were Enacted, Southern Exports to Cuba Could Increase by \$122.1 Million

Exports to Cuba by Port State

Implications

- ✓ Cuba has been a Strong Market for U.S.
 Agricultural Products 26th in '08, 27th in '09
 All Purchases Being Paid Before Delivery
- ✓ Lack of Credit has Hindered Sales to Cuba Market down to 38th through November 2010
- ✓ Cuba Relies Heavily on Tourism and Nickel Prices for Foreign Exchange
- ✓ U.S. Restrictions on Travel, Recently Eased, and Rising Nickel Prices may Lead to Greater Cuban Demand for U.S. Ag Products

Implications

✓ Southern Agriculture Participates Fully in U.S. Exports to Cuba

✓ Corn, Chicken Meat, Soybeans/Products, Wheat, Feeds, and Pork Are Most Important

✓ Economic Impacts in Supporting Sectors and Port Use Important to the South
