Reduce Winter Feeding with Stockpiled Forage and Winter Pasture

Online Program: Watch from Home and Save Gas

Friday, August 26, 2022

Would you prefer to feed hay for 60 days? 100 days? or 150 days?
Here's an opportunity to learn how to significantly reduce your hay feeding needs.

Nitrogen fertilizer prices have decreased about 30% from recent highs and continue to trend lower.
Winter pasture could be a good option to greatly reduce winter feeding costs.

Program presented by:

Drs. Vanessa Corriher-Olson and Jason Banta

Topics include:

- Stockpiled forage: management and utilization
- Acres needed per cow for stockpiled forage and winter pasture
- Cool-season forages and variety selection
- Establishment and fertilization
- Monthly and seasonal forage production potential
- Appropriate mineral supplementation
- Estimated costs

Register by August 25th at 12:00PM: \$35/person

- Electronic copies of slides and other program materials will be available prior to the program
- All sessions will be recorded and available for later viewing for those that register

The program will be divided into 3 sessions to allow attendees to have a break between sessions

9:00 - 11:00 AM Part 1
12:30 - 2:30 PM Part 2
4:00 - 6:00 PM Part 3
